Summary

Am an iOS Software Engineer armed with an increasingly extensive knowledge of SwiftUI, swift programming language, core data, Third-Party Libraries using CocoaPods, and APIs. I believe I can swiftly surpass anybody's expectations in a Software Development Environment.

Experience

iOS Developer

DOCSUN

Jan 2022 - Jul 2022 (7 months)

Worked on a 6 months contract as the iOS developer for Docsun computation labs.

Consultant iOS Developer

HeyInnovations

Jul 2022 - Present (4 months +)

I work as a part-time consultant iOS developer for Hey Innovation where the iOS App is yet to go live on the App Store

iOS Developer

Forever Beauty

May 2021 - Present (1 year 6 months +)

I design and build applications for devices running Apple's iOS operating software. I am responsible for designing and coding the base application, ensuring the quality of the application, fixing application bugs, maintaining the code, and implementing application updates.

Flutter Developer

Forever Beauty

Mar 2022 - Present (8 months +)

iOS Developer

HAVA

Aug 2020 - Jul 2022 (2 years)

Hava is a modern, sustainable and fast-growing online ride-hailing company based in Kenya with an aim of balancing a Driver's need to earn a livelihood with that of a Rider, affordable transportation across major cities and towns. With a wide range of options to choose from; vehicle types to drivers nearby, we are the panacea to all your conveyance ills. Riders can quickly request a ride from their mobile phone using the Hava app.

I develop efficient and robust iOS Applications bridging the “first-mile” gap to high quality transit.

Information Technology Specialist

Kenya Broadcasting Corporation (KBC)

Sep 2019 - Dec 2019 (4 months)

Android Developer

May 2019 - Aug 2019 (4 months)
